INFRASTRUCTURE

AIR JET LOOM

We operate 60 TOYOTA JAT 810 Eshade machinery, fully equipped with 16 shafts/4 colour with additional jacquard selvedge & single Top Beam attachment, allowing us to produce a wide range of fabric with exceptional quality. This Japanese machinery tuned to run at 1100 rpm ensures 100% safety and durability with maximum output.

RAPIER MACHINES

We also operate 24 Itama R-9000 machines with 20 shafts / 8 colours, additional jacquard selvedge, and single and double Top Beam attachments, thus allowing us to produce a wide array of fancy shirts, kurta fabrics, ladies' fancy fabrics like kurti, and linen fabrics with maximum technology utilisation.

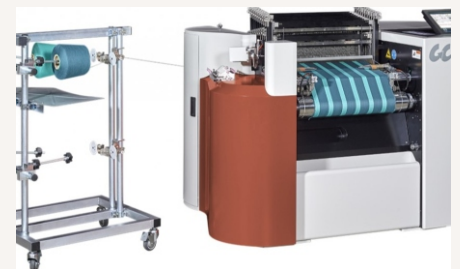

HANDLOOM SAMPLING

With our in-house desk loom facility, we can quickly address our client's design and appearance issues by producing a 24 Inch X 14-inch cm sample.

CCI LOOM

On this sampling machine we can produce small sample of 2 mtr X 24 inch

Weaving Supplements

Our state-of-the-art machineries are fully equipped with weaving supplements like single Top Beam Double Top Beam, Bobbin attachment, Jacquard selvedge attachment, Lino weaving attachment etc., allows us to cater to all customer requirements in one place.

Lab and Digital Printing Machine

With fabric colour testing machines we can match the desired colour for our client and with digital pigment printing machines we can print the final version of fabric with a printed look for design purposes.

Yardage Sampling

With our in-house cone to sizing and sampling loom for fabric weaving we can weave yardage of 5 mtr to 100 mtr to get a better result and feel after weaving, this help our client to get the desired result by finishing the fabric and preparing the final garment in small sample.

Garment Sampling

Our company also provides facilities of Garment sampling for Gents wear, Ladies wear and children wear.

KEY PERFORMANCE

- Automation : We are among first companies with 100% automation of business operations and sales.
